### Specifying Kee Klamp® Components

Each fitting has a simple numerical code reference, which defines the type of fitting and the pipe size, or sizes, it is designed to receive. The first number, preceding the dash (-) identifies the type of Kee Klamp® fitting. A single digit, following the dash, defines tube size. Two single digits after the dash indicate that the fitting is designed to receive two sizes of tube.

**Examples:**

**10-8**  Both sockets 'A' and 'B' designed to accept tube size **8**

**45-76**  Socket 'A' designed to accept tube size **7**  
Socket 'B' designed to accept tube size **6**

**10-8** Kee Klamp® Fitting Type **10**

**45-76** Kee Klamp® Fitting Type **45**

Kee Klamp Fittings Size	Tube Diameter mm o/d	Nominal Bore mm	In
3	17.5	10	3/8"
4	21.3	15	1/2"
5	26.9	20	3/4"
6	33.7	25	1"
7	42.4	32	1 1/4"
8	48.3	40	1 1/2"
9	60.3	50	2"

YOU'LL NEVER BE BETTER PROTECTED

# Safety Components Guide

- DESIGNED TO SUIT BS EN 10255 (ISO 65) STEEL TUBES FROM SIZES 17.5MM TO 60.3mm
- GALVANISED TO BS EN ISO 1461 OR AVAILABLE WITH POLYESTER COATING IN ANY RAL COLOUR
- FLEXIBLE SOLUTIONS FOR ALL TYPES OF SAFETY BARRIERS AND STRUCTURES
- WIDEST PRODUCT RANGE AVAILABLE
